WORK EXPERIENCE

WPPluginsDev - *São Paulo, Brazil*   2019-Present

WordPress Plugin Developer | Cofounder

Responsible for project management and software development.

- Developed an inverted index search engine that increases the **performance** of search results by **40% to 60%** of the Ivory Search Plugin.
- Designed, architectured, and developed a subscription box system integrated into Brazilian **payment gateways** for **recurring payments** for an online premium tea store. Hundreds of subscriptions are managed every month.
- Developed a **free WooCommerce plugin** that allows the management of order status, creating new status or customizing existing ones.

Venda de Sites - *SãoPaulo, Brazil*   11/2008 - Present

Full Stack Developer | Cofounder

Responsible for project management, software architecture and technological decisions for e-commerce projects, billing system, auction site, email marketing system and website builder in segments such as institutional websites, e-commerce, real estate, and others.

- Implemented **Linux web and database servers** for high performance and availability hosting, using **Amazon Web Services** - Cloud Computing and Digital Ocean. Also took care of **security policies** and disaster recovery plans.
- Developed the first version of a **Website Builder** (Click and Build style), using **WordPress Multisites** for Locaweb, the main hosting company in Brazil and Latin America.
- Conducted **training** for customers to use the developed systems, WordPress and its plugins.

Incsub/WPMUDEV - *Remote, Australia*   03/2014 - 11/2014
Lead Developer

Lead the development of a **WordPress plugin** to control content exclusively for **subscribers**, including a **billing** system, as well as integration with payment gateways such as **Paypal, Authorize.net** and **Stripe**.

- Elaborated the **modeling** of software in **UML** based on the **MVC Design Pattern** adapted for WordPress.
- **60% less support calls** after the new version has been released.
- Provided level 2 technical support for several company plugins.

InVistion/Scala - *São Paulo, Brazil*   08/2005 - 09/2007
Consultant

Performed project management, systems analysis, software architecture and development in systems integration and **BPM** (Business Process Management) projects, using **IBM middleware**.

- Collaborated in projects for big clients: VR/Smart.Net, Tecban, SSAGlobal, Doux-Frangosul, among others.
- Obtained the following **certifications**: IBM SOA Fundamentals, IBM Object-Oriented Analysis and Design with UML, Sun Java Programmer (SCJP).
